Org Plus For Windows

#1 Selling Org Chart Maker

Org Plus® For Windows™ is for managers, business professionals, and executive assistants who need to create professional-looking organization charts quickly and easily. Automatic chart drawing, easy editing, custom formatting, and compact layouts make Org Plus the fastest and easiest way to create the exact chart you need.

Quickly creates organization charts - no drawing required!

Simply select a box tool at the top of the window and click on the chart to add boxes. Org Plus automatically draws and spaces the boxes and precisely lays out the connecting lines. Then type names, titles, and other information into each box. Org Plus automatically expands or shrinks the boxes to fit your text perfectly.

Type up to 30 lines of information in each box. You can format the information in almost any conceivable way - put information on the outside corners of each box, stack it up in columns inside the box, and give it any font, size, or style. And different groups of boxes can have different formats.

Free Adobe Type Manager

Included inside Org Plus For Windows is a copy of Adobe Type Manager®. This program lets you display and print high-quality fonts in various sizes and styles - a $99.00 value absolutely free!

Updating charts is a snap

Updating your Org Plus chart is a snap because you make changes directly to the chart. With a few mouse clicks, you can add, insert, delete, or move boxes - even entire departments. Org Plus does all the redrawing for you.

Whenever you make changes, Org Plus automatically maintains a uniform box size and even spacing. And you always see exactly what the chart will look like when printed!

Customize your charts

Choose from over 50 different chart, box, and line styles to achieve just the look you want. Org Plus automatically applies your choices to the entire chart or to any set of boxes you select.

Use the Template feature to establish a personal or corporate chart standard. Create a basic chart layout once and save it as a template.

Add your company logo, or type notations anywhere in the chart. You can even insert pictures of your employees directly into each box. A complete set of drawing tools lets you create any special effect you can't get automatically.
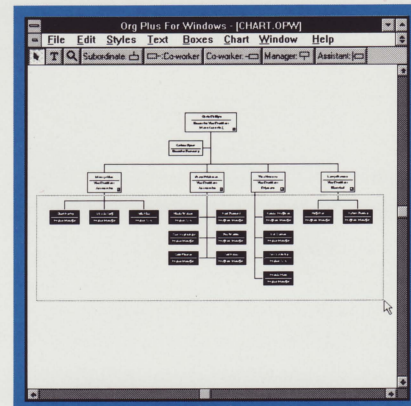

Compact charts show lots of information

Users of organization charts want their charts to be as compact as possible - preferably on one page. Org Plus automatically finds the most compact arrangement of boxes with no performance penalty. Use the free, small sized fonts included, or use the Make Fit command to apply space-saving changes automatically. Simply tell Org Plus how small you want your chart to be, and Org Plus does the rest. It can even tell you exactly how much to reduce it on your printer or copy machine to make it fit!
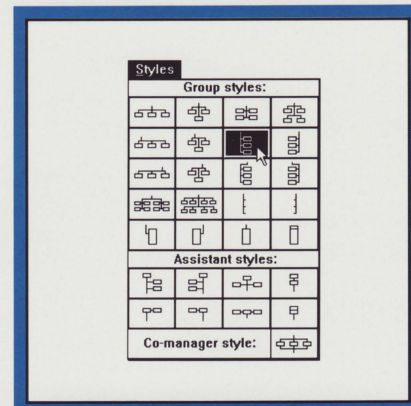

Multi-platform solution

Share Org Plus For Windows charts with Org Plus Advanced (DOS) and Org Plus For Macintosh users. Now there's no need to worry about which computer you are using. Org Plus runs on them all!
